

CORPORATE CULTURE INTELLIGENCE

Build a Corporate AI That Reflects How Your Company Thinks

Turn your company's experience, values, and way of solving problems into intelligence every employee can use.

Preserve knowledge

Keep experience available

Align decisions

Across departments

Strengthen culture

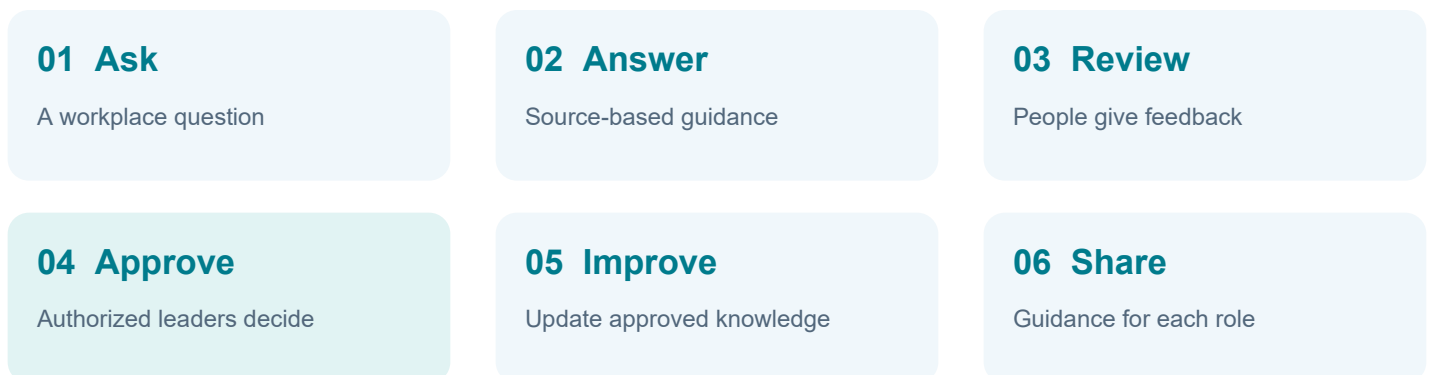

As your company grows

Your knowledge. Your way of working.

Yudaro combines approved company knowledge, leadership principles, operating experience, and governed employee feedback to create more consistent, company-aligned guidance across every department.

ASK. LEARN. REVIEW. IMPROVE.

Private, permission-controlled, source-based, and guided by human approval.

Implementation scope is agreed and tested. Sensitive conversations can be excluded; feedback is not automatic training. Leaders can correct, retire or update knowledge as culture evolves.

YUDARO / RESTAURANT POS

Restaurant POS Package

\$899 + tax

Everything you need to start taking orders and payments.

Restaurant ERP implementation is not included in the \$899 Restaurant POS Package.
